Premium Colours

- Slight colour variation of grout may occur between different batches of grout manufactured.
- Cracking and colour variation will occur if excessive water is used during mixing and clean up.
- Water must be clean, colour shade variations can occur due to variations in tile porosity, finishing techniques and site conditions.
- To check the ease of cleaning, apply grout to small trial areas before the actual application.
- Apply the grout on small areas at a time and promptly clean off surplus grout to avoid discolouration or staining on tiles.
- For wall tiling, use minimum joints of 2mm. For floor tiling, use 3mm joints.

Grout For Every Purpose

Tile Grout Application

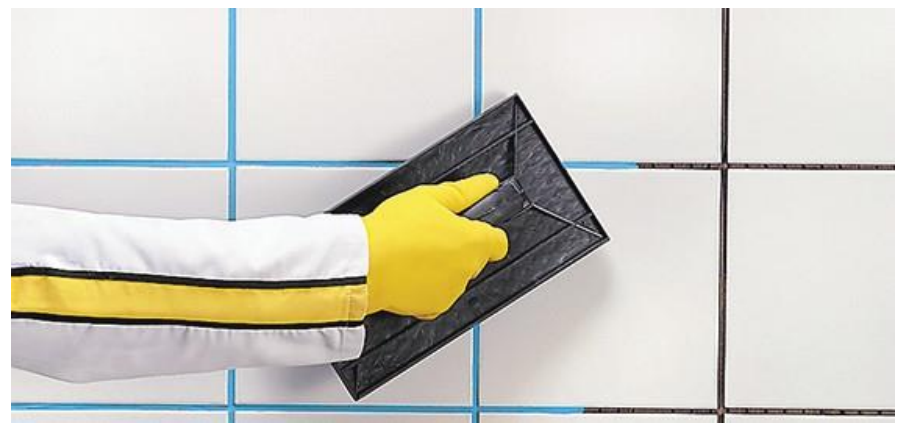

Allow adhesive bed to set 24 hours before grouting. Ensure that joints are dry, clean or free of contaminants.

Step 1

Mix Weber tile grout with clean water as per the recommended mix ratio.

Step 2

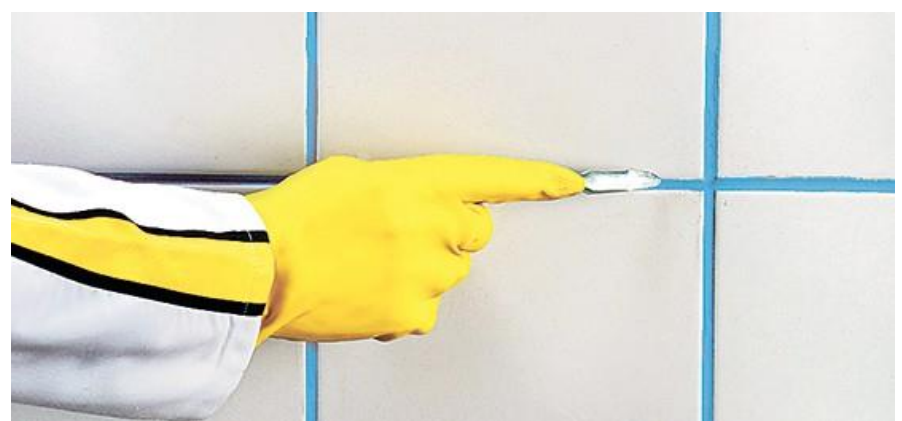

Apply grout into joints using a grout float/ rubber squeegee.

Step 3

Clean excess or residue grout promptly using a damp cloth or sponge; before it dries out.

Step 4

When grout is sufficiently firm, polish tile surface with a clean dry cloth to remove grout film/haze. Allow grout to set for 24-48 hours.
