

JOB DESCRIPTION

Job Title	Intern – Process, Quality Improvement & Continuous Improvement		
Location	Gyproc, Port Klang	Function/ Department	Production
Reporting To (Job Title)	Plant Manager		

JOB PURPOSE

To support the plant's process quality monitoring and continuous improvement efforts, with strong focus on leading indicators, standardisation, and loss prevention, in line with Gyproc World Class Manufacturing (WCM) principles.

JOB DESCRIPTION

- Support **process quality monitoring** in line with WCM Quality pillar standards.
- Assist in **collecting, analysing, and trending process and quality data** as **leading indicators** (process stability, compliance, early abnormality detection).
- Support monitoring of **process adherence to standard operating procedures (SOPs)**.
- Assist in identifying **quality risks, deviations, and process losses** before they become defects or customer issues.
- Participate in **Continuous Improvement (CI) / Focused Improvement (FI)** activities related to quality, cost, and process stability.
- Support preparation and maintenance of **quality visual management tools** (dashboards, trend charts, control boards).
- Assist in updating **SOPs, checklists, and standard work documentation**.
- Support **shopfloor activities, Gemba walks, and WCM reviews** with Operations and Quality teams.
- Prepare **basic reports and presentations** on improvement, progress and findings

REQUIREMENTS

- Currently pursuing a **Science-based course**, preferably **Chemistry / Chemical Science**.
- Other relevant studies may include **Applied Science or equivalent**.
